

World News API

CAPABILITIES & PLATFORM OVERVIEW

Turn the world's news into structured, real-time data.

"The only News API you'll ever need."

World News API is a REST API that indexes **170,000+ articles every day** from 210+ countries in 86+ languages – then enriches each one with sentiment, categories, and named entities, so your systems can query the global news stream like a database. Real-time and historical, macro and single-name.

170k+

ARTICLES INDEXED

ARCHIVE SINCE JAN 1

From a breaking headline to years of archives – one consistent, machine-readable schema, reachable through 21 language SDKs, an OpenAPI spec, and a native AI (MCP) integration.

TRUSTED BY DATA TEAMS & RESEARCHERS AT

WHAT THE PLATFORM DOES

Ten REST endpoints span the full news workflow — from discovery to extraction to enrichment — and every article is returned in one consistent, fully machine-readable schema.

Discover

[Search News](#) · [Top News](#)

Full-text **and** semantic search across the live stream, with operators, filters, and country/date scoping. Top News clusters thousands of articles into ranked stories per country and day.

Retrieve & Extract

[Retrieve](#) · [Extract News](#) · [Extract Links](#)

Pull any article by ID, or turn a raw URL into clean structured JSON — title, full text, images, videos, author, and optional entity/sentiment analysis.

Enrich

[Sentiment](#) · [Entities](#) · [Geo](#) · [Categories](#)

Sentiment scoring (-1...+1), named-entity tagging (people, organizations, locations), geo-radius search (1-100 km), 13 categories, and author/source filters — applied at ingest.

Sources & Utility

[Search/Suggest Sources](#) · [Site-RSS](#) · [Geo-coordinates](#)

Search and request indexed publications, browse 6,000+ newspaper front pages, convert any site into an RSS feed, and geocode place names to coordinates.

```
// GET /search-news?text=...&Language=en { "offset": 0,
"number": 10, "available": 83, "news": [{ "id":
206030983, "title": "Nearly 30 aftershocks recorded near
NJ...", "text": "New Jersey continues to shake after...",
"url": "https://nypost.com/2024/04/06/us-news/...",
"publish_date": "2024-04-06 22:44:18", "author":
"Deirdre Bardolf",
"language": "en",
"source_country": "us",
"sentiment": -0.545,
"category": "environment"
}] }
```

One schema, enriched at ingest

- **Highlighted fields** are added by World News API — they are not in the source article.
- **sentiment** (-1...+1) and **category** make the stream filterable and quantifiable out of the box.
- **Semantic entities** let you query by ORG:, PER:, LOC: instead of brittle keywords.
- Identical fields are returned for **live and historical** results — backtest on the same shape you run live.

Near-real-time freshness

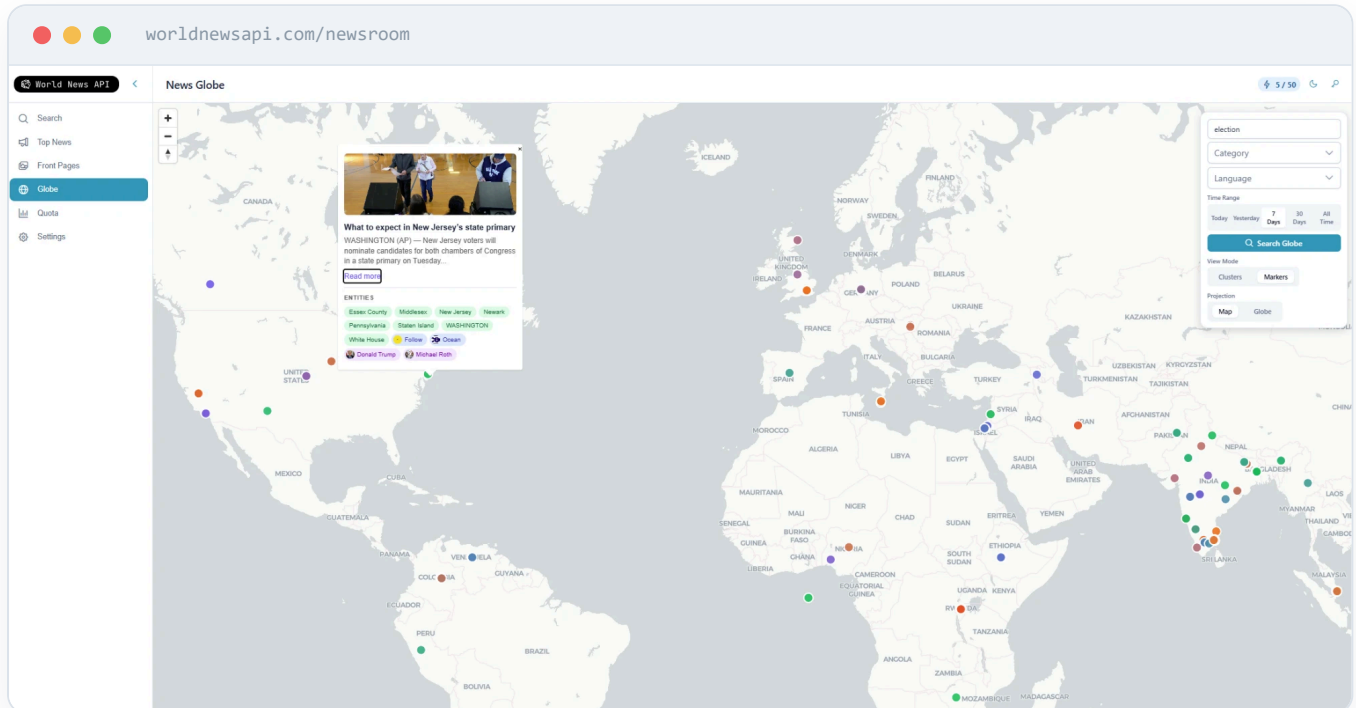

History since 2022

Live X-API-Quota-* headers

Transparent point-based billing

EXPLORE THE API WITHOUT WRITING CODE

Newsroom is a free, browser-based workspace that turns every endpoint into an interactive tool — so analysts, researchers, and product teams can explore the world's news and judge coverage and data quality before a single line of code is written.

The News Globe — every dot is a story, filtered live by keyword, category, language, sentiment & time range.

Interactive 3D news globe

See stories plotted by location worldwide — cluster or marker view, flat map or globe projection.

Top news & 6,000+ front pages

Browse clustered headlines and daily newspaper front pages from 125+ countries.

Advanced search, point-and-click

Every Search News filter — keyword, category, language, sentiment and time range — without code.

Entities, sentiment & live quota

Inspect the people, organizations and places tagged in each article, with usage tracked in real time.

Built for evaluations. Share a link with non-technical stakeholders so the whole team can assess the data during a trial — no integration required.

[Open Newsroom →](#)

WHAT SETS IT APART

Most news APIs return headlines and links. World News API returns the whole picture – broader, deeper, and already enriched for analysis.

210+ / 86+

Unmatched coverage

Countries and languages – among the widest reach of any commercial news API.

Entities

Semantic search

Query by people, organizations & places (LOC/ORG/PER) – synonyms and spelling handled.

-1...+1

Sentiment built in

Every English & German article is scored at ingest, ready to filter and aggregate.

Geo

Location-radius search

Surface news mentioning anywhere within 1–100 km of a coordinate.

6,000+

Front-page archive

Daily newspaper front pages across 125+ countries – a feature competitors lack.

AI-native

MCP + 21 SDKs

Native Model Context Protocol server for Claude/ChatGPT, plus full text and 21 SDKs.

CAPABILITY	WORLD NEWS API	NEWSAPI.ORG	GNEWS	NEWSDATA.IO	PERIGON
Countries covered	210+	55	71	206	Global
Languages supported	86+	14	41	89	Multi.
Full article text in results	✓	~	~	~	✓
Sentiment analysis	✓	–	–	✓	✓
Entity tagging & search	✓	–	–	✓	✓
Geo-radius location search	✓	–	–	~	✓
Newspaper front-page archive	✓	–	–	–	–
Native AI / MCP integration	✓	–	–	–	✓
Free tier (no credit card)	✓	✓	✓	✓	✓

Where peers lead, too: NewsData.io offers a longer historical archive, and Perigon stronger story clustering and multilingual sentiment – both are included here precisely so the comparison stays honest. World News API's edge is coverage breadth, the newspaper front-page archive, geo-radius search, and enrichment that's included by default.

Compiled from public documentation & pricing, June 2026. “~” = limited or paid-tier only; some figures are plan-restricted. “Global / Multi.” where a provider does not publish exact counts. Capabilities evolve – verify current specs.

WHERE TEAMS PUT IT TO WORK

One API serves data science, research, product, and risk teams alike – each consuming the same enriched stream.

Alt-data & sentiment signals

Build news-sentiment factors over single names or whole sectors, then backtest on the archive.

search-news · min/max-sentiment

Media & brand monitoring

Follow coverage of a brand, product, or executive across thousands of global sources in real time.

search-news · news-sources

Research & data science

Assemble multilingual, multi-country corpora with consistent fields and history back to 2022.

search-news · historical

Event detection on holdings

Track organizations and people as entities to catch market-moving events the moment they break.

entities=ORG:... · top-news

AI / RAG grounding

Ground LLMs and agents in fresh, attributable news via the native MCP server or article extraction.

MCP · extract-news

Risk, ESG & geo-events

Monitor regions, supply-chain hubs, or ESG themes with category filters and geo-radius search.

location-filter · categories
